Mr. Anand Kumar

CREATED BY

A. Varun Kumar

TOOLS USED

Power BI Desktop Power Query, DAX &
Power BI
Service

SUBMISSION DATE

[09/06/2026]

Prepared as part of the Power BI Masterclass Program to demonstrate skills in Data Analysis, Data Modeling, DAX Development, Dashboard Design, UI/UX, Storytelling, and Business Intelligence Reporting.

PROJECT OVERVIEW

=====

PROJECT OBJECTIVE

Develop a comprehensive Power BI dashboard to analyze sales, profit, customers, products, and regional performance for a retail business

Participants are expected to:

- ✓ Analyze sales performance
- ✓ Evaluate profitability
- ✓ Understand customer behavior
- ✓ Assess regional performance
- ✓ Generate business insights
- ✓ Present recommendations

PROJECT GOAL

Transform transactional retail data into meaningful business insights that support decision-making, performance monitoring, and business growth.

BUSINESS PROBLEM

Retail management requires a clear understanding of sales performance, profitability, customer behaviour, and product contribution to make better business decisions.

The objective is to identify:

- Which products generate the highest sales?
- Which regions contribute the most profit?
- Which customer segments drive business growth?

- How discounts impact profit?
- Which products require business attention?

BUSINESS QUESTIONS

Participants must answer:

1. What is total sales revenue?
2. What is total profit?
3. Which products perform best?
4. Which regions generate maximum revenue?
5. Which customer segments contribute most?
6. How do discounts affect profit?
7. What are the sales and profit trends over time?

DATASET INFORMATION

DATASET NAME : Superstore Dataset

DATASET DETAILS : Approximate Records 9,994+

Columns : 19+

EXPECTED ANALYSIS AREAS

Sales Analytics

Profit Analytics

Customer Analytics

Product Analytics

Regional Analytics

Superstore Sales & Profit Analysis POWER QUERY TRANSFORMATIONS

DATACLEANINGACTIVITIES

- ✓ Removed Duplicate Transactional Records
- ✓ Validated Sales and Profit Numerical Data

- ✓ Handled Missing Values and Blank Categories
- ✓ Corrected Data Types (Dates, Currency, Whole Numbers)
- ✓ Standardized Regional and Segment Categories

DATAPREPARATIONACTIVITIES

- ✓ Renamed Columns for Clean Visualization Formatting
- ✓ Created Custom Columns for Business Logic Slicing
- ✓ Replaced Values for Incomplete or Blank Product Fields
- ✓ Split Columns (e.g., Extracting Product Type from SKU Strings)
- ✓ Merged Columns (e.g., Unifying Customer Names or Complete Addresses)
- ✓ Removed Unnecessary Operational Columns to Optimize Performance

SCREENSHOT 3 Power Query Editor Screenshot

DAX MEASURES USED

=====

Total Sales

Total Sales = SUM(Data[Sales])

PURPOSE: Calculate overall sales.

Total Profit

Total Profit = SUM(Data[Profit])

PURPOSE: Calculate Overall profit

Total Orders

Total Orders = COUNT(Data[Order ID])

PURPOSE : Calculate Total count of order

Top Performance Region

TopPerformanceRegion=CALCULATE(SELECTEDVALUE(Data[Region]),TOPN(1,ALL(Data[Region]),[Total Sales],DESC))

PURPOSE : To check the top performance region ex: east

Avg Order Value

Avg Order Value = DIVIDE([Total Sales],[Total Orders],0)

PURPOSE : to calculate the Average of Orders

Profit Margin %

Profit Margin % = DIVIDE([Total Profit],[Total Sales],0)*100

PURPOSE : Measures the overall Profitability

LINE CHART: Discount Impact on Profit.

DASHBOARD SCREENSHOTS

=====

EXECUTIVE OVERVIEW

Explanation

Analyses high-level business performance and executive metrics.

SALES ANALYTICS

Explanation

Analyses sales trends and revenue distribution.

PROFIT ANALYTICS

Explanation

Analyses profit margins and product profitability.

CUSTOMER ANALYTICS

Explanation

Analyses customer behaviour and purchase patterns.

PRODUCT ANALYTICS

Explanation

Analyses product performance and discount impacts.

KEY INSIGHTS

INSIGHT-1

Sales volume spikes sharply in the final quarter of the year, peaking in November.

INSIGHT-2

Annual sales revenue shows continuous upward growth year-over-year since 2015.

INSIGHT-3

Technology products generate the highest overall net profit for the company.

INSIGHT-4

Customer purchase volumes increase steadily and consistently quarter-over-quarter.

INSIGHT-5

Offering higher discount rates drastically reduces and cuts into product profitability.

BUSINESS RECOMMENDATIONS

RECOMMENDATION-1

Focus more on the West Region to increase sales and profit.

RECOMMENDATION-2

Give special attention to Consumer customers as they generate the most sales.

RECOMMENDATION-3

Promote high-profit products like Copiers, Phones, and Accessories.

RECOMMENDATION-4

Reduce losses from Tables and Bookcases by improving pricing and sales strategies.

RECOMMENDATION-5

Keep valuable customers engaged through loyalty and reward program

Business Analysis

PROJECT STORYTELLING

BUSINESS SCENARIO

Retail and e-commerce organizations generate large amounts of transactional data related to sales, profits, customer orders, product categories, and discount metrics. However, decision-makers often struggle to convert this information into meaningful business insights that support revenue optimization, product management, and customer satisfaction.

BUSINESS PROBLEM

- Which business segments provide the highest revenue?
- How do monthly trends affect sales growth and order volume?
- Do high discount rates increase or hurt product profitability?
- Which customer groups demonstrate better purchasing behaviour?
- What product categories influence overall net profit margins?

ANALYSIS APPROACH

- Analyzed business revenue across regional consumer segments.
- Compared sales growth against monthly and quarterly timelines.
- Evaluated product expenses, losses, and net profit margins.
- Measured the impact of heavy discounting strategies on earnings.
- Analyzed buyer satisfaction through repeat customer purchase patterns.

KEY FINDINGS

Year-end shopping spikes significantly increase monthly sales revenue.

Technology products generate the highest overall net profits.

Regular customer buying habits show steady quarterly growth.

High product discount rates drastically reduce profit margins.

BUSINESS IMPACT

Supports revenue optimization planning.

Improves product portfolio management.

Enhances customer retention strategies.

Provides data-driven sales insights.

Enables better pricing decision-making.

PROJECT DEPLOYMENT

DEPLOYMENT OBJECTIVE

Deploy the Power BI solution to enable stakeholders to access interactive dashboards and business insights in real time.

DEPLOYMENT PLATFORM

Power BI Service

DEPLOYMENT PROCESS

Power BI Service

STEP-1

Validate Retail Data Models and Sales/Profit DAX Measures in Power BI Desktop.

STEP-2

Optimize Dashboard Visuals, Slicer Interactivity, and Report Performance.

STEP-3

Publish the E-Commerce PBIX File to the designated Power BI Workspace

STEP-4

Configure Scheduled Dataset Refresh Settings for up-to-date transactional data.

STEP-5

Create Unified Executive Dashboards from Published Report tiles.

STEP-6

Apply Row-Level Security (RLS) for Regional Managers and Access Permissions.

STEP-7

Share the Interactive Dashboards with Retail Business Stakeholders.

BUSINESS BENEFITS

Centralized Retail Reporting Platform.

Interactive Sales and Profit Analytics.

Real-Time Transaction Performance Monitoring.

Improved Strategic Inventory Planning.

Faster Data-Driven Pricing Decisions.

CONCLUSION

=====

The Retail Sales & Financial Performance Analytics Dashboard successfully analyzed sales revenue, profit margins, customer behaviour, product performance, and discount impacts.

The project generated valuable insights that can help organizations improve revenue optimization, product portfolio management, customer retention strategies, and business pricing decisions.
